

10.3Gbps LR/LW Dual Port Fiber Bypass Module

Product Description

The LR/LW Dual port fiber single bypass modules is design expressly for Intrusion Prevention System (IPS) provides complete visibility to network traffic, It also introduces a point of failure should the IPS lose power, cable fail or application freeze. The module design for PCI Express X8 interface, which means it can support 10.3Gbit/s in full duplex mode per port of data transfer rate and Single-mode fiber operations. LR/LW Quad port fiber bypass modules designed to be compliant digital diagnostic monitoring function: Temperature, VCC, TX optical power, TX laser bias current, and RX received optical power. The post-amplifier of the LR/LW Dual port fiber single bypass module also includes a Loss of Signal (LOS) circuit that provides a TTL logic-high output when the received optical level is below a preset LOS Assert threshold.

Features

- Compliant with IEEE 802.3ae 10GBASE-SR
- Compliant with IEEE 802.3ae 10GBASE-SW
- Link Distances at 10.3Gbps 300m links with 50/125um OM-3 MMF Cable
- EEPROM with Series ID Function
- Quad LC Connector interface with optical Bypass Function
- Laser Class 1 Product with comply with Requirements of IEC 60825-1 and IEC 60825-2
- LED indicate operation function

Applications

- In-Line traffic Monitoring, Analyzing and Optimization
- Intrusion Prevention System
- Quality of Service
- In-Line Security
- Load balance
- Web Acceleration Appliances

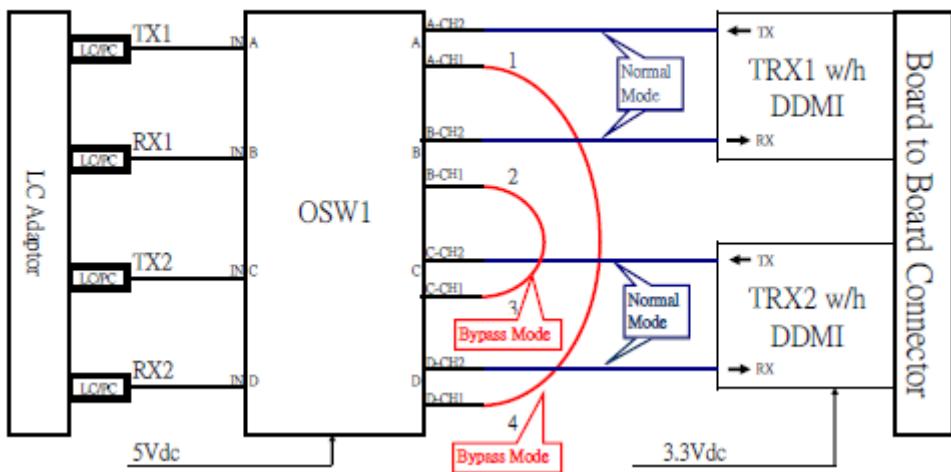

LASER SAFETY

This Single-mode Quad Port Fiber Bypass Module is a Class 1 laser product. It complies with IEC 68025 and FDA 21 CFR 1040.10 and 1040.11. The module must be operated within the specified temperature and voltage limits. The optical port of the module shell be terminated with an optical connector or with a dust plug.

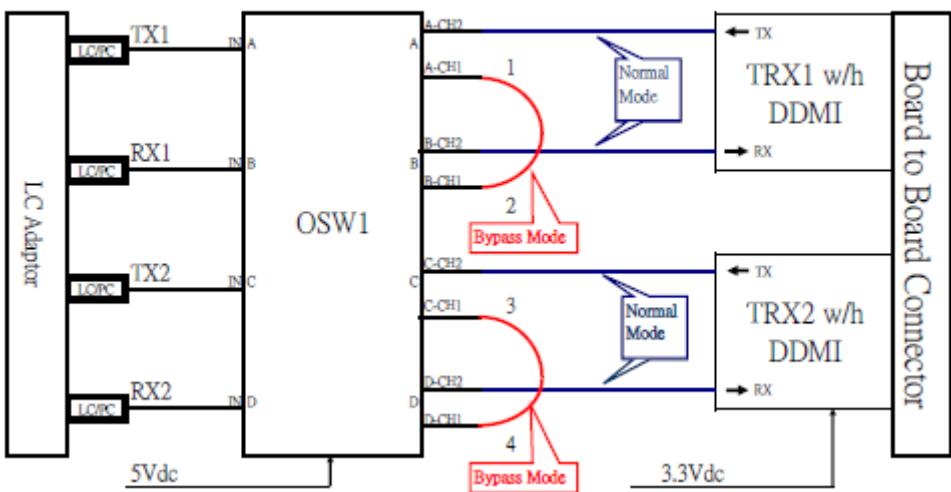

LR/LW Quad Port Bypass Module – Optical Path Portion

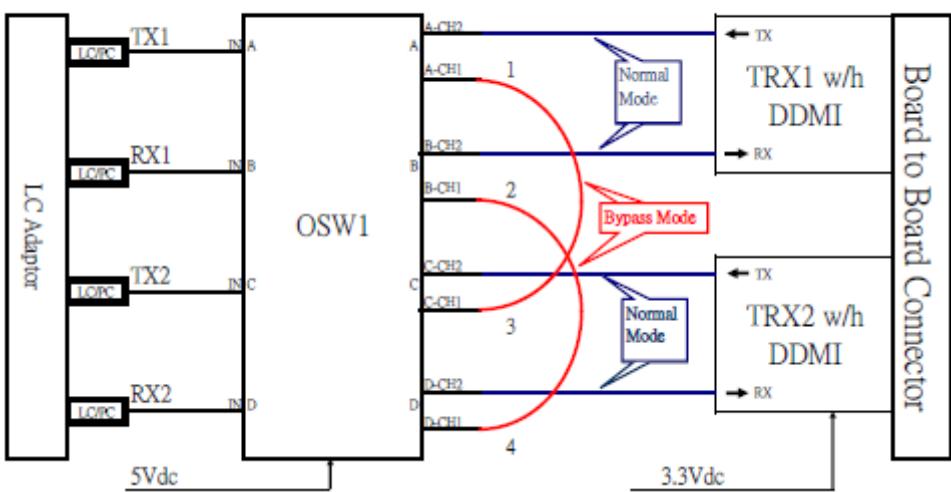

Dual Port One Bypass Path is 1<→ 4 & 2<→ 3

Dual Port One Bypass Path is 1<→ 2 & 3<→ 4

Note :

1. Internally AC couples and terminated to 100-Ohms differential load.
2. Pull up to Vcc on Host-Board.
3. Internally AC coupled, but requires a 100-Ohms differential termination at or internal to Serializer/Deserializer.
4. These are 20%~80% values.
